

The fm radio station that I listen to (KLOVE) is the ONLY station that I listen to. This station provides daily "food" and guidance to many people, including myself. If this station were to be displaced from the fm airways, it could be devastating to the community as there are people who have stated that it has actually saved their life by hearing a certain song or statement made on this very clean airway. This station is very important to my community and to the thousands of others who are fortunate enough to be able to pick it up in their town.
